### DESCRIPTION

The expansion tank from the HGT Series are offered in sizes going from 2 to 13 gallons. These expansion tanks are build of two welded part to resist high pressures for a secure installation. The EPDM bladder separates the air from the water inside the tank saving space and energy. These devices are suitable for hot water, solar and cooling in addition to being compatible with glycol.

- ▶ Acceptance factor of 100%
- ▶ Water remains permanently separated from the air throughout the useful life of the installation
- ▶ The water does not escape the circuit. The steel tank never comes into contact with water
- ▶ Pre-charged at the factory to 12 PSI; tank need to be adjusted on site at the system operating pressure

### TYPICAL SPECIFICATIONS

Furnish and install, as shown on the plans, a \_\_\_\_\_ gallons/liters \_\_\_\_\_ in/mm diameter × \_\_\_\_\_ in/mm (high) air precharged steel expansion tank, with an EPDM fixed bladder that separate water from touching the steel shell of the tank. The tank must have a 100% acceptance factor and shall have NPT connection as well as a .302"-32 charging valve (standard tire valve) to facilitate the on-site charging of the tank to meet system requirements. Each tank shall be a CALEFACTIO model HGT-\_\_\_\_\_ or approved equal.
